Tobichoco@gmail.com 916-296-6990 Sacramento, CA Linkdin /GitHub: TobiASC22

Education

California Sacramento state university, CA **Computer Engineering**

Expected Gradution date: 2028 Organization: MESA

Experience

Google code next: Student Developer / Participant

- Selected to participate in Google's computer science and coding program for high school students. Learned key programming concepts in Python, JavaScript, and web development through hands on workshops.
- Worked on collaborative coding projects and received mentorship from Google engineers and industry professionals.
- Gained experience in teamwork, design thinking, and creative problem solving within a professional learning environment.

Allstar code: Summer Intensive Participant

- Completed an intensive computer science and entrepreneurship program designed to prepare students for careers in tech.
- Built interactive projects using HTML, CSS, JavaScript, and APIs while learning about startup culture and innovation.
- Collaborated in teams to develop a final web app project presented to industry professionals.
- Strengthened leadership, communication, and project management skills through mentorship and hands-on learning.

Personal Projects

Rc plane out of Cardboard **April 2020**

- Designed and built a remote-controlled airplane from cardboard, demonstrating skill in aerodynamics, structural design, and electronics integration.
- Programmed and tested RC controls to have flight performance.
- Making multiple prototypes enhances durability and flight efficiency.

Ultrasonic Distance Sensor **June 2022**

- Built an Ultrasonic Distance Sensor system using Arduino to measure distances and trigger LEDs based on proximity, demonstrating skills in sensor integration, programming, and electronics.
- Tested and completed the system for accuracy and responsiveness

3D Printed Projects **November 2020-Till**

- Designed and produced a wide range of 3D printed creations, including custom Nerf gun parts, car accessories, room décor, small sculptures, and Arduino components.
- Gained experience in hands on fabrication, iterative prototyping, and design customization for both practical and decorative uses.

Skills

- python
- Java
- Html
- CSS
- Assembly
